

In the article “Protocol of the Comparison of Two Different Bicarbonate Replacement Fluids during Continuous Veno-Venous Hemofiltration with Regional Citrate Anticoagulation: A Prospective, Randomized, Controlled Trial” [Blood Purif. 2025;54:723–732; <https://doi.org/10.1159/000547401>] by Köglberger et al., the authors noticed an error in Table 2 of their article.

The correct text should read: “3. LBF is reduced by 200 mL steps per hour (provided dose ≥ 25 mL/kg/h) to a target HCO_3^- of >22 mmol/L.”
