

IEEE TRANSACTIONS ON INTELLIGENT VEHICLES

The IEEE TRANSACTIONS ON INTELLIGENT VEHICLES (T-IV) publishes peer-reviewed articles that provide innovative research concepts and application results, report significant theoretical findings and application case studies, and raise awareness of pressing research and application challenges in areas of intelligent vehicles in a roadway environment, and in particular in automated and vehicles. The T-IV focuses on providing critical information to the intelligent vehicle community, serving as a dissemination vehicle for IEEE ITS Society members and the others to learn the state of the art development and progress on research and applications in the field of intelligent vehicles. *Member copies are for personal use only.*
